

Laboratory for Microbial Ecology

Faculty of Agriculture, University of Belgrade, Serbia

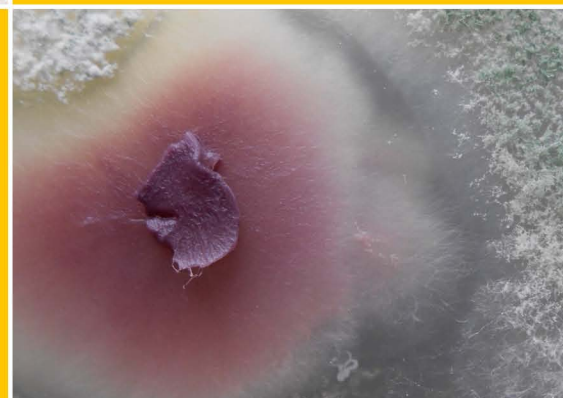

Research areas
and expertise

Development of
microbial products
for biodegradation
of organic pollutants
in soil

Biodegradation of
specific agro-industrial
and municipal waste

Isolation and selection
of indigenous microbial
species from devastated
environments and their
application in
bioremediation

Investigation of human
pathogens in food chain
(water, compost, fresh
fruits and vegetables)

Selection of plant
growth promoting
bacteria and their
usage as bio-fertilizers

Team leader
Professor
Vera Raicevic
(verar@agrif.bg.ac.rs)

Assistant Professor
Blazo Lalevic
(blazol@agrif.bg.ac.rs)

Assistant
Jelena Jovicic Petrovic
(jelenap@agrif.bg.ac.rs)

Assistant
Igor Kljujev, PhD
(ikljujev@agrif.bg.ac.rs)

PhD student
Vera Karlicic
(karlicicvera@gmail.com)

PhD student
Jelena Petricevic
(petricevicjelena@yahoo.com)

PhD student
Danka Radic
(danka.radic@hotmail.com)

PhD student
Ivana Spasojevic
(ivana.mirovic@gmail.com)

Specialist
Natasa Stosic
(natasa@agrif.bg.ac.rs)
